## EDUCATION

### Carnegie Mellon University, School of Computer Science

Master of Science in Machine Learning

Sep. 2024 – Dec. 2025 (Expected)

Pittsburgh, PA, United States

- **GPA:** 4.0/4.0
- **Research Interests:** LLM Personalization & Mechanistic Interpretability, Natural Language Processing
- **Relevant Coursework:** Introduction to Machine Learning (PhD-level), Advanced Deep Learning, Generative AI

### National Taiwan University

Bachelor of Science in Computer Science, Valedictorian, Summa Cum Laude (top 1%)

Sep. 2019 – Jun. 2023

Taipei, Taiwan

- **GPA:** 4.28/4.3, **Rank:** 1/177
- **Awards:** Outstanding Youth Award, Presidential Award, Dean's List Award (4x), Best TA Award

## SKILLS

**Programming:** Python, C, C++

**Libraries & Tools:** PyTorch, NumPy, Scikit-learn, Pandas, Hugging Face, Docker

**Domains:** LLMs, LLM Personalization, Natural Language Processing, Speech Processing, Parameter-Efficient Fine-Tuning

## WORK EXPERIENCE

### WorldQuant

Research Intern

Jan. 2023 – Feb. 2023

Taipei, Taiwan

- Implemented “Alphas” models for equity market prediction using diverse datasets (price, volume, options, analyst ratings, fundamentals) on internal platforms.
- Achieved a highly profitable trading strategy with a Sharpe ratio over 3.7 and a turnover rate below 10% by fine-tuning and testing it on a decade of U.S. stock market data.

### Google

Software Engineering Intern

Jun. 2022 – Oct. 2022

Taipei, Taiwan

- Reduced the time spent on addressing Joint Design Manufacturing (JDM)-related issues by 25% through designing and implementing an automated Python tool to locate bugs during collaboration.
- Automated regression discovery by developing a tool integrated with the internal database for historical data analysis.

### ASUS Intelligent Cloud Services (AICS)

Software Engineering Intern

Mar. 2022 – Jun. 2022

Taipei, Taiwan

- Built a digital medical AI platform, adopted by two of Taiwan's top 10 hospitals to transition from paper-based systems.

## RESEARCH EXPERIENCE

### Speech Processing & Machine Learning Laboratory

Advisor: Professor Hung-yi Lee

Feb. 2022 – Dec. 2023

National Taiwan University

- Enhanced performance and efficiency by utilizing Neural Architecture Search (NAS) algorithms to optimize adapter selection, structure, and placement within self-supervised speech representation models.

### Machine Intelligence & Understanding Laboratory

Advisor: Professor Yun-Nung Chen

Sep. 2021 – Jun. 2023

National Taiwan University

- Developed a Transfer Learning framework to assess model suitability, achieving over 85% accuracy in selecting and sequencing intermediate tasks using the “Transferability” metric.

## PUBLICATION

### PEFT for Speech: Unveiling Optimal Placement, Merging Strategies, and Ensemble Techniques

Tzu-Han Lin<sup>†</sup>, How-Shing Wang<sup>†</sup>, **Hao-Yung Weng<sup>‡</sup>**, Kuang-Chen Peng<sup>‡</sup>, Zih-Ching Chen<sup>\*</sup>, Hung-yi Lee<sup>\*</sup>

ICASSP SASB 2024

## EXTRACURRICULAR ACTIVITIES

### National Taiwan University, CS Student Council

Director of Academic Section

Sep. 2021 – Jun. 2022

National Taiwan University

- Promoted diversity and equity in Taiwan's Computer Science education by leading a six-day camp for over 120 high school students with a team of over 50 college students, providing free passes for underrepresented groups.
- Bridged the resource gap between freshmen from public and private high schools by creating lectures on widely used tools, including Git and Linux, to ensure equal technical preparation.
